

Jamb Cam

Designed to capture quality images used for evidence

The
Perfect
Shot

JambCam is a color camera designed to go virtually unnoticed as it captures high-resolution, full-face images of people entering or exiting your building.

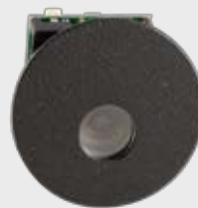

Two models are available:

- **High-resolution** color camera for standard lighting conditions
- **Wide-dynamic** color camera designed for work in direct sunlight

Mounted directly in a door jamb, the JambCam incorporates the optimum angle and height to record full-face images of people passing through the entry/exit door. Picture clarity and resolution can be more than ample for introduction as courtroom evidence.

JambCam mounts are available in three finishes, Black, Silver and Primer to accommodate custom colors that match existing jamba.
